Jaipur, India | +91 94618 78928 | piyush32013@gmail.com

PROFESSIONAL SUMMARY

Python-aware Frontend Developer with 4+ years of experience building responsive, data-driven applications using React.js, Next.js, TypeScript, and modern ES6+ JavaScript.

Brings workable hands-on knowledge of Python game-development concepts through freelance Panda3D practice, including scene graph basics, task loops, collision logic, asset loading, and interactive 3D environment structure.

Comfortable reviewing code behavior, edge cases, rendering flow, API output, and gameplay-style logic with careful attention to accuracy, maintainability, and user impact.

Practical Git/GitHub collaborator with experience in code reviews, technical documentation, Jira, Chrome DevTools, remote Agile workflows, and clear written reasoning.

Familiar with C++ fundamentals for reading logic, understanding engine-adjacent patterns, and communicating implementation tradeoffs in structured technical feedback.

Well suited for AI model training and evaluation work that requires domain-specific programming judgment, concise explanations, iterative feedback, and strong attention to output quality.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, PHP (Basic), C++ (Basic)

Game Development: Panda3D Fundamentals, 3D Scene Graphs, Task Manager/Game Loops, Collision Handling, Camera Controls, Asset Loading, Gameplay Logic Review

Frontend Frameworks: React.js, Next.js, React Hooks, Component Architecture, Recursive UI Rendering, Reusable Component Libraries

State, Data & APIs: Zustand, Redux, REST APIs, JSON Parsing, Data-Driven UI, API Integration, Debounced Persistence

Quality & Workflow: Git, GitHub, Code Reviews, Technical Documentation, AI Training Feedback, Remote Collaboration, Basic Software Testing, CI/CD Workflow Awareness

Performance & Tooling: Chrome DevTools, Webpack, Page-Load Optimization, API Overhead Reduction, UI Refactoring, Debugging

Visual & Content Evaluation: Image Assessment & Quality Review, Visual Inconsistency Detection, Content Evaluation & Annotation, Edge Case Identification & Documentation, Adobe Photoshop, Adobe Lightroom

PROFESSIONAL EXPERIENCE

fusionAlx | Hyderabad, Telangana, India | On-site | Oct 2025 - Present

Software Engineer

- Build and optimize React.js/Next.js interfaces for secure, data-heavy banking and insurance applications in a distributed Agile environment.
- Review complex UI behavior, API responses, form flows, and edge cases with strong attention to accuracy, consistency, and user impact.
- Navigate data-driven interfaces carefully to verify expected behavior, identify anomalies, and support accurate browser-based review workflows.
- Debug data-driven interfaces using structured validation, JSON analysis, Chrome DevTools, and careful review of state, rendering, and API behavior.
- Document implementation decisions, findings, issue patterns, and observed behaviors clearly for cross-functional teams, supporting better review cycles and product quality.
- Built a debounced autosave utility to reduce data-loss risk and improve reliability during network interruptions.
- Developed a recursive JSON formatter to convert raw API responses into readable, collapsible trees for faster debugging, review, and inspection.
- Standardized reporting and visualization views across multiple application instances while preserving business rules and consistency.
- Maintained calibrated, consistent evaluation standards across iterative review cycles by liaising with cross-functional peers as project criteria and quality rubrics evolved.

Freelance / Contract Projects | Remote | Jan 2024 - Apr 2025

Python Game Development & AI Training Contributor

- Built small Panda3D practice prototypes in Python to understand scene graph setup, task-manager update loops, camera movement, model loading, and interactive 3D object behavior.
- Reviewed gameplay-style code samples for practical issues in rendering flow, collision checks, input handling, asset paths, state updates, and readable game-loop structure.
- Documented code-review feedback in clear, concise language, explaining observed behavior, likely defects, improvement options, and tradeoffs for AI training-style evaluation tasks.
- Applied C++ fundamentals to reason about engine-adjacent logic, object lifecycle, performance considerations, and structured debugging patterns in game-development contexts.
- Used GitHub workflows for repository organization, commits, issue-style notes, and versioned examples while working independently in a remote contractor setup.

Cliquify | United States | Remote | Jul 2022 - Sep 2025

React Developer

- Developed responsive React.js and Next.js interfaces for a U.S.-based platform, translating Figma designs into clean, production-ready dashboard experiences.
- Integrated REST APIs and worked with nested data structures, validating rendered output for accuracy, completeness, and edge-case behavior.
- Created reusable components and recursive rendering logic to support complex UI flows and improve maintainability across Brand Kit, Library, Campaigns, and Dashboard modules.
- Reviewed UI states, responsive behavior, and API-driven content to identify defects, inconsistencies, and improvement opportunities.
- Followed detailed requirements closely and documented implementation behavior to support clear handoffs, reliable delivery, and accurate review outcomes.
- Built practical judgment in evaluating technical output against requirements, design expectations, and user-facing quality standards.

Codespur Technologies Pvt. Ltd. | Jaipur, Rajasthan, India | On-site | Jun 2022 - Sep 2025

React Developer

- Developed dynamic, responsive web interfaces from high-fidelity Figma designs using React.js, Next.js, JavaScript, and modular component patterns.
- Created reusable components and recursive rendering logic for nested data structures, improving maintainability across complex UI flows.
- Integrated REST APIs for real-time data rendering and implemented custom state management with Zustand.
- Improved page performance through efficient rendering, reusable UI structures, and focused browser debugging with Chrome DevTools.
- Worked in Git/GitHub code review workflows, collaborated with cross-functional teammates, and documented implementation decisions for cleaner handoffs.
- Strengthened testing-oriented thinking by validating UI states, reviewing edge cases, checking responsive layouts, and confirming browser behavior against expected outcomes.
- Contributed to additional React projects including a kabaddi player record app and an e-commerce website, with focus on data accuracy, responsive behavior, and UI consistency.

Full Stack Learning | Jaipur, Rajasthan, India | Hybrid | Dec 2021 - May 2022

Internship Trainee

- Built practice projects with HTML, CSS, JavaScript, and React while strengthening frontend fundamentals and structured problem-solving.
- Gained exposure to programming logic, C++ basics, reusable components, responsive layouts, and Figma-to-React workflows.
- Practiced reviewing code behavior, identifying issues, documenting observations, and improving implementation accuracy through guided learning projects.

TP | Jaipur | On-site | Jul 2019 - Mar 2022

Customer Support Specialist

- Handled high-volume customer interactions with careful attention to accuracy, consistency, and clear written communication across diverse inquiry types.
- Applied structured review criteria to evaluate interaction quality, flagging inconsistencies, identifying recurring patterns, and documenting findings to support continuous improvement.
- Operated independently in a structured review environment, maintaining calibrated standards and adapting to evolving guidelines and project rubrics.

Freelance | Jaipur, Rajasthan, India | Remote | Mar 2019 - Jan 2021

Digital Design Trainee

- Joined as a part-time trainee under a photographer during the final year of college to learn the core craft and production workflows of Adobe Photoshop and Lightroom.
- Developed hands-on proficiency in image editing, precise photo retouching, background manipulation, and creative digital layouts.
- Reviewed client digital assets carefully and applied structural design adjustments to ensure visual harmony, clarity, and brand consistency across diverse project deliverables.
- Evaluated client image deliverables against established visual quality standards, detecting inconsistencies and deviations, and communicating findings through concise, well-structured written documentation.
- Developed calibrated visual judgment for assessing diverse image types; proactively identified edge cases and surfaced creative ambiguities for collaborative resolution.

PROJECTS

panda3d-scene-explorer | GitHub: heysinghaaa/panda3d-scene-explorer | Panda3D scene setup, model loading, camera controls, task-loop logic, and tested movement helpers.

panda3d-ai-training-code-review-samples | GitHub: heysinghaaa/panda3d-ai-training-code-review-samples | Panda3D/Python review samples for task loops, input callbacks, proximity logic, asset loading, fixes, and edge cases.

EDUCATION

Bachelor of Technology (B.Tech) - Automobile Engineering

Arya College of Engineering and IT, Jaipur, India | August 2019

Certification: Frontend Web Development

Full Stack Learning, Jaipur, India
