PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of experience building responsive, data-driven products with React, Next.js, TypeScript, and modern JavaScript. Creates reusable component systems, complex API-driven workflows, and accessible interfaces with careful attention to edge cases, maintainability, and user impact. Open-source builder of Elsecase, an installable React workflow registry backed by unit, accessibility, browser, and clean-install verification.

TECHNICAL SKILLS

Frontend: React, Next.js App Router, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, responsive UI, component architecture

State, forms, and data: Zustand, Redux, TanStack Table, React Hook Form, Zod, REST APIs, JSON parsing, URL state, debounced persistence

Quality and tooling: Vitest, Testing Library, axe, Playwright, Storybook, ESLint, GitHub Actions, Git, Chrome DevTools, CI/CD

Additional: Python, FastAPI, Panda3D fundamentals, PHP basics, C++ basics, WordPress, Adobe Photoshop, Adobe Lightroom

PROFESSIONAL EXPERIENCE

fusionAlx | Hyderabad, India | On-site | Oct 2025 - Present

Software Engineer

- Build and optimize React and Next.js interfaces for secure, data-heavy banking and insurance applications in a distributed Agile environment.
- Review complex UI behavior, API responses, form flows, and edge cases for accuracy, consistency, accessibility, and user impact.
- Built a debounced autosave utility that reduced data-loss risk during network interruptions and a recursive JSON formatter that made API responses faster to inspect.
- Standardize reporting and visualization views while preserving business rules; document implementation decisions and recurring issue patterns for cross-functional teams.

Freelance / Contract Projects | Remote | Jan 2024 - Apr 2025

Python Game Development and AI Training Contributor

- Built Panda3D prototypes covering scene graphs, task-manager loops, camera movement, asset loading, collision checks, and interactive object behavior.
- Reviewed gameplay-style code and documented defects, edge cases, fixes, and tradeoffs in concise technical feedback for AI training evaluation tasks.
- Used GitHub workflows for repository organization, versioned examples, and independent remote delivery.

Cliquify | United States | Remote | Jul 2022 - Sep 2025

React Developer

- Developed responsive React and Next.js dashboard experiences from Figma for Brand Kit, Library, Campaigns, and API-driven workflows.
- Integrated REST APIs and nested data structures, validating loading, empty, error, and responsive states for accuracy and maintainability.
- Created reusable components and recursive rendering logic for complex flows; documented implementation behavior for clear handoffs and reliable delivery.

Codespur Technologies Pvt. Ltd. | Jaipur, India | On-site | Jun 2022 - Sep 2025

React Developer

- Built dynamic React and Next.js interfaces from high-fidelity designs using modular components and responsive layouts.
- Integrated REST APIs and Zustand state; improved rendering performance and browser behavior through focused Chrome DevTools debugging.
- Collaborated through GitHub review workflows and validated edge cases, responsive layouts, and expected user-facing behavior.

Full Stack Learning | Jaipur, India | Hybrid | Dec 2021 - May 2022

Internship Trainee

- Built HTML, CSS, JavaScript, and React projects while developing reusable-component, responsive-layout, and structured problem-solving fundamentals.

TP | Jaipur, India | On-site | Jul 2019 - Mar 2022

Customer Support Specialist

- Handled high-volume customer interactions and applied structured review criteria to identify patterns, document findings, and maintain consistent quality standards.

Freelance | Jaipur, India | Remote | Mar 2019 - Jan 2021

Digital Design Trainee

- Produced and reviewed retouched images and digital layouts in Photoshop and Lightroom, maintaining visual consistency across client deliverables.

SELECTED PROJECTS

Elsecase | Next.js, React, TypeScript, Tailwind CSS, shadcn/ui

Live: <https://elsecase.vercel.app/> | Source: <https://github.com/heysinghaaa/Elsecase>

Open-source registry of editable workflows for loading, refreshing, empty data, failures, offline behavior, responsive data exploration, validation, autosave, retry, and recovery. Verified with 58 unit/accessibility tests, 28 Playwright checks, Storybook, CI, and clean-install production builds.

RAG Vision Lab | Next.js, FastAPI, Docling, Qwen3-VL, Ollama

Repository: <https://github.com/heysinghaaa/RAG-PixelRAG>

Local evidence-first laboratory comparing Docling HybridChunker RAG with screenshot-native PixelRAG over shared documents, questions, retrieval depth, and reader settings. Includes paired SSE runs, inspectable chunks and tiles, citations, latency separation, and a 16-case labeled demonstration suite.

JobProof | Next.js, FastAPI, TypeScript

Live: <https://jobproofintelligence.vercel.app/>

Explainable job-application proof tool with project matching, scam signals, and optional user-owned AI analysis.

Ledgerly | Next.js, TypeScript

Live: <https://ledgerlyhq.vercel.app/>

Personal invoice and expense tracker with dashboard metrics, editable invoice workflows, persistence, and print-ready previews.

EDUCATION

Bachelor of Technology - Automobile Engineering

Arya College of Engineering and IT, Jaipur, India | Aug 2019

Certification - Frontend Web Development

Full Stack Learning, Jaipur, India
